ABOUT **HUNT-PRO**

With over 30 years of experience in creating secure safes and world-recognised hunting equipment, Hunt-Pro prides themselves on being innovators in the hunting and shooting industry.

Hunt-Pro have custom designed an extensive range hunting equipment and secure safes for the Australian market, which are not only affordable but are of the highest quality and workmanship. Designed in Australia, Hunt-Pro safes are one of the most secure safes available in the market, you can rest assured that your investment is in safe hands.

Tough Series

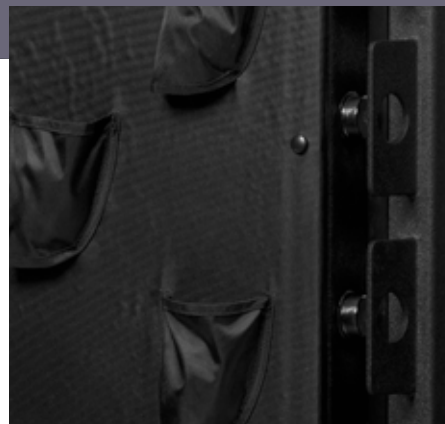

The Tough Series provides the best priced security on the market today. It's built tough!

H Lok Innovative Anti Pry Technology

Maintaining their position as innovators in the industry, Hunt-Pro's innovative "H Lok" design ensures the highest standard in Anti-Theft technology.

The H Lok system's innovative design incorporates locking tabs on the door with matching slots on the body which adds two extra points of contact for the bolts to secure and interlock the door and body together. This interlocking effect creates an extremely rigid reinforcement, providing the most secure and anti-pry safe technology on the market. No wonder Hunt-Pro are known to be the most difficult safes to break into.

Two extra points of contact to interlock the door and body together.

Pro Series

The Pro Series features a digital lock for convenience of access and a Pro Rack inside to maximise storage.

HD16

Superior Collection

For the ultimate in luxury and security, the Superior Collection has it all.

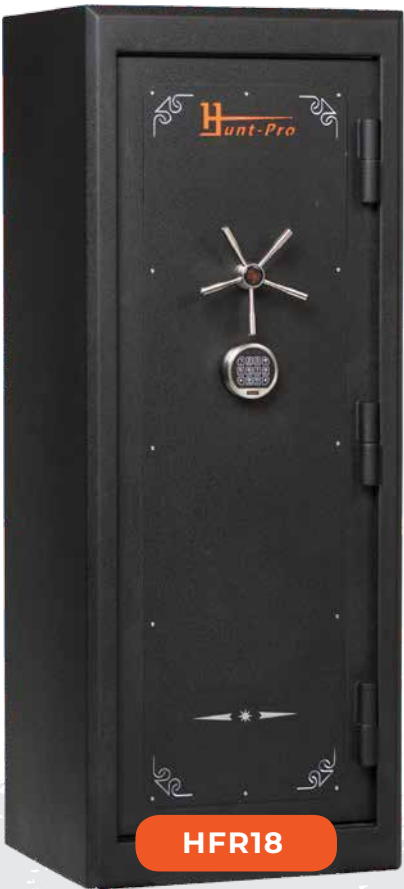

Guardian Series

The Guardian Series Safe is the new fire protective range. Each safe in the series has a 180degree opening door to easily access the interior. There are multiple interior setups for racks and shelves.

Pistol Series

The 6mm thick sides and door makes the Pistol Series compliant in all states.

HFR26

Estimated fire rating 75 mins*

HCH16

HCH32

HP1

HP2

HFR18

Estimated fire rating 45 mins*

HFR36

Estimated fire rating 75 mins*

Pro Series Plus

Thicker walls and sides make these safes a headache for people attempting to break in.
